Summary

A full-stack web developer with 15 years of relevant experience seeing off projects from the requirement capture phase through final deployment and eventual maintenance. I have experience working with remote teams in different time zones as well as on-site teams. Experienced working on cloud platforms backend frameworks like Laravel, Spring Boot, .NET Core, databases like MySQL, SQL Server, and MongoDB, and containerization using Docker.

Takes pride in taking ownership of work and writing maintainable, extensible code that meets the product development standards for a product in production.

Work Experience and Leadership

September 2018 - April 2023

Teronext (On Contract for Yembo.ai)

- Ensured the uptime of all microservices on the client's SaaS product while being the key contributor to the central API service
- Managed a team of four, facilitating client requirement responses and bridging the cultural gap between American and Indian development teams.
- Automated a process to notify clients of bugs before customers reported them by parsing logs. Used root cause analysis to eliminate the major bugs systematically,
- Implemented cleanup tasks to manage MongoDB database sizes and reinforce the data retention policy.
- Received a 10x award for fast onboarding and demonstrating strong product development skills.
- As a key contributor to the central API microservice, maintained zero downtime for the product over the last two years by employing a safe coding style and a prudent release strategy.

June 2018 - September 2018

Freelance Developer

- Organized the application in a repository and provided the client with access to his code and server.
- Implemented WordPress Development and SEO changes based on input from tools like Ahrefs and SEMrush.

June 2014 - June 2018

MB9 Software Solutions LLC, Bengaluru (Bangalore) - Lead Engineer

- Led a team of four to see projects through from requirement capture to deployment and maintenance, ensuring high-quality code and adherence to SDLC best practices.

- Captured the requirements and created the functional specification documents with the clients.
- Completed two Projects involving Spring Boot and Hibernate from requirement capture (handled all the major tasks, web design, and high-level server management) and project maintenance.

June 2008 - June 2014

QBurst Technologies, Thiruvananthapuram - *Senior Software Engineer*

- Developed web applications on multiple technologies (Spring 3, Magento, Drupal, Flask) and languages (PHP, Python, Java)
- Completed requirement capture with clients and collaborated with the business team for document sign-off
- Planned and saw through agile weekly sprints routinely
- Co-ordinated with business analysts to carry out estimations for projects contracted to various teams in the company

Education

August 2003 - April 2007 - **Undergraduate degree**

College of Engineering, Thiruvananthapuram – Bachelor of Technology (Electronics & Communication Engineering)

CGPA - 6.1 certified by the **University of Kerala**

May 2023 - August 2024 - **Ontario College Graduate Certificate**

Conestoga College, Brantford Campus - Web Development

CGPA - 3.88 out of 4
